# SYNERGI PIPELINE - INSPECTION MANAGER TRAINING

Course code: SY-62  
Duration: 4 days

Prerequisite:  
None.

---

## DESCRIPTION

---

**Inspection Manager for users:** This training is intended for compliance supervisors and field crew supervisors managing compliance activities such as, adding new equipment and schedules, assigning work, managing timely completion of work, reviewing historical information and completing electronic inspection forms. This training will include use of Asset Register, Scheduling and Tracking, and Field Manager.

**Inspection Manager for administrators:** This training is intended for persons providing application support to Essentials users and administering the Inspection Manager applications. This training will include setting Inspection Manager application permissions, creating roles, adding and updating user profiles and field device settings. In addition, you will learn to use, Setup Manager to create new inspection forms, create complex business rules for validating inspection data, and Process Designer, to help automate complex business processes, etc.

Topics covered include:

- Asset Register user training
- Scheduling and Tracking user training
- Field Manager user training
- Setup Manager user training
- Overview of GIS/Map Viewer integration

---

## LEARNING OBJECTIVES
